- 6) ☐ Other: _____

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

The disclosure is objected to because of the following informalities: the section titled "BRIEF DESCRIPTION OF THE DRAWINGS" is missing on page 6 of the specification.

Also, TABLE 2 is improperly set forth on page 14 of the specification, after the claims.

Appropriate correction is required.

Claims 22-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the treatment of cancer, does not reasonably provide enablement for treating any disorder or diseases. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. There is a good reason to doubt that a dextrin polymer anti-cancer drug conjugate of claim 1 is useful for treating any other diseases or disorders other than cancer.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1623

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-4, 6-13 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by the International Patent No. WO 98/56424A.

The International Patent discloses the claimed dextrin polymer drug conjugate.

Claims 1-13 and 17-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over the International Patent NO. WO 98/56424A.

The International Patent discloses a succinoylated dextrin polymer drug conjugate but does not disclose conjugates wherein succinoylation is at least 20mol%. However, a person having ordinary skill in the art at the time the instant invention was made would have been motivated to vary the degree of succinoylation of dextrin, because such a person would have expected the resulting compounds to have similar utility.
